1.1 Preface

WP6 deliverable definition: On-line repository and electronic dissemination mechanisms

On-line repository and electronic dissemination mechanisms: Set up ADVANCE wiki and eprints repository for ADVANCE results. Set up IIG mailing list and social networking forums. As well as a project website with a project logo to distinguish this project.

1.2 On-line repository and electronic dissemination mechanisms

The following mechanisms are in place and in use for the ADVANCE project.

The ADVANCE Website

The ADVANCE website has been established at <http://www.advance-ict.eu/> with the ADVANCE project logo. Links are provided to the project fact sheet, detailed project description, workplan and related FP7 projects.

Document Repository

An SVN repository, hosted by the University of Southampton, has been created for document version control and sharing.

The ADVANCE General Mailing List

The mailing list *Advance* has been established for the use of all ADVANCE participants.

The ADVANCE Executive Board Mailing List

The mailing list *Advanceexec* has been established for the use of the ADVANCE executive board members.

Repository for ADVANCE Results

The *eprints* repository, established at the University of Southampton for the FP7 DEPLOY project, will be used for the ADVANCE project.
